

Short extract from a Webcredible usability evaluation report

Call-to-action issues

There's no prominent call-to-action on the page for site visitors who want to buy the product

UltraTEV Detector™
Dual sensor Partial Discharge (PD) detection tool

The world's best instrument for 'first pass' asset condition testing

[click image to download brochure](#)

BENEFITS

- Identify faults BEFORE they lead to failures
- Test for critical PD activity instantly
- Detect surface AND internal PD activity
- Essential personal safety device
- Minimal training requirement
- Low cost, high productivity

FEATURES

DUAL SENSOR TECHNOLOGY

- Ultrasonic sensor detects PD activity beyond audible range
- TEV sensor detects PD activity as transient earth voltage effects
- Both sensors are calibrated to indicate instantly when PD activity is at a potentially critical level

CLEAR DISPLAY

- Green LED indicates the asset is working normally
- Amber LED indicates PD activity that requires more frequent monitoring
- Red LED indicates PD activity that requires immediate investigation - and potential danger to personnel

EASY TO USE

- One button operation with instant start-up
- Light, portable and ergonomically designed
- Kit complete with carrying case, protective sleeve and mains battery charger

OVERVIEW

The UltraTEV Detector won the Queens Award for Enterprise: Innovation, as a genuine technological breakthrough - the world's first dual sensor handheld PD instrument. It has transformed the ability to detect PD activity and won sales around the globe. Many power asset owners issue UltraTEV Detectors as standard equipment for all personnel working with MV and HV equipment: as the most effective tool for identifying potentially damaging faults, and as a valuable aid to personal safety.

Recommendations

Premierbathrooms.co.uk has a dedicated page which explains the purchase process

Purchase Process

Overview

Purchasing a Premier Care Walk-in bath is as easy as one, two, three.

- Contact Premier Care by phone or website to schedule an appointment with one of our friendly Bathing consultants.
- Meet with our Bathing consultant, in the comfort of your own home, to discuss your needs and determine the best Walk-in bath or Easy Access shower for you and your home.
- Schedule the installation.

Design Service

Premier Care's design service will help you determine the best Walk-in bath for your personal needs combined with your existing bathroom dimensions.

Our knowledgeable consultant will discuss your health concerns and ailments to establish which baths will benefit you the most. He or she will also review the brochure with you and discuss which baths and showers you are most interested in, take measurements of your current bathroom and entry doors to determine the ideal bath for your home, draw out a scaled down version of your bathroom to help you visualise how your new Walk-in bath will fit, and discuss the design, installation, and an all inclusive price.

All of this will be completed during your in home consultation which takes approximately one hour.

Installation Service

Premier Care offers full-service installation and customised attention with each bath we sell. We are always clean and courteous, poring over every detail to make sure you are completely satisfied with your new Walk-in bath.

Most Walk-in baths are installed in a matter of days. Installation includes removing your old bath, adapting your existing plumbing, installing your new Walk-in bath and cleaning up the surrounding area so that your bath is ready to use the very next day.

All our Walk-in baths and showers are installed by local bathroom remodeling and plumbing professionals.

Next Step

Order a Free Brochure and schedule a complimentary in home consultation by using the contact form on the right hand side of this page.

It is time for a change... contact Premier Care in Bathing Today and start to enjoy bathing again!

Navigation issues

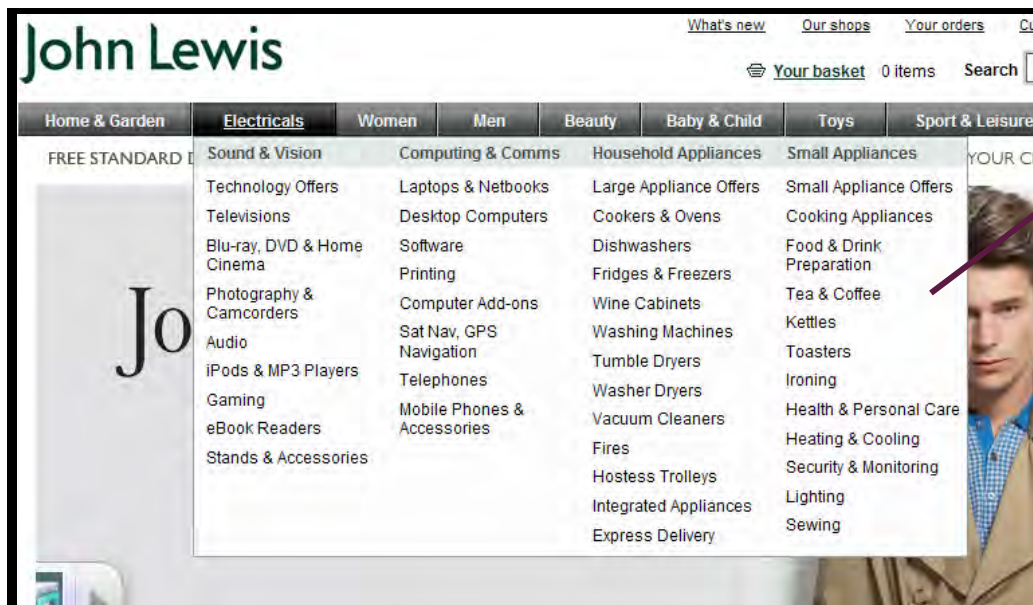

Visual design issues with sub-navigation

Recommendations

- Reduce the levels of subheadings to no more than 3
- Alternatively, provide an overview to help site visitors find information easily

John Lewis provides an overview of all the subheadings under each main heading

Recommendations

Use different colours to distinguish between different levels of subheadings

Use appropriate indentation to provide a clear view of the hierarchy of the subheadings

An example of a good contrast between text and background
